Calling makes a huge difference! Here's what you need to say:

"I'm calling to ask the Member to support the request to include \$80,000 in the state budget for Children in Foster Care prescribed psychotropic medications. These funds will ensure that foster children prescribed psychotropic medications will have access to a child psychiatric review no matter where they live. This is needed because of the documented overmedication of foster children. A psychiatric review of prescriptions for foster children was recommended by the state auditor in her recent report."
